

## Lencolo 2108 Special High-efficiency Defoamer for UV System

### Description

**Lencolo 2108** is an acrylate-modified, non-silicone defoamer designed for solvent-based and solvent-free coatings. It delivers strong anti-foaming, de-foaming and foam-breaking performance, and is particularly effective in high-viscosity systems. It also shows good compatibility, minimizing cratering risks and ensuring safe application performance. It is especially suitable for pure UV systems, including UV coatings, UV screen printing inks, and UV clear varnishes.

### Technical Data

Composition	Acrylate copolymer
Appearance	Transparent liquid
Specific Gravity	0.85±0.02
Active Content	100%

### Product Features

Strong and fast defoaming performance with excellent compatibility — particularly effective in 100% UV clear coats and UV screen inks

Broad compatibility with many resins,

It solves persistent defoaming issues in high-viscosity systems by suppressing foam entrainment during mixing and promoting the release of micro-bubbles.

Does not affect re-coatability; suitable for anti-foam use in PU primers / intermediates / topcoats and does not reduce adhesive bonding strength

### Applications

It is particularly suitable for pure UV-curing systems, including coatings, inks and adhesives.

It can also be used in two-component PU systems, amino baking enamels, nitrocellulose dipping lacquers, acid-curing amino systems, and epoxy formulations, covering both solvent-based and solvent-free technologies.

### Recommended Usage

Addition amount: 0.1 ~ 2.0% of the total amount

Users are advised to determine the best addition amount through experiments before use.

### Storage Conditions

To prevent premature polymerization due to the high reactivity of this product, keep it tightly sealed and store away from heat sources and direct sunlight. It is recommended to maintain storage temperature below 30 °C. Unused product should be promptly resealed and must not be left open. Under ventilated conditions at 25 °C, the product has a safe storage period of 6 months. Available packaging: 25 per drum.

**Tips: Lencolo 2108 provides strong and fast defoaming with excellent compatibility. It is particularly suitable for pure UV-curing systems, including coatings, inks and adhesives.**

Note: Technical data represents typical values only. In view of the differences in formulas, production process, conditions, all the above statements must be adjusted according to the actual situation, our company does not make any promises. Our company reserves the right to reform its products without prior notice of any changes.
