

## Lencolo 5012 Anti-fouling Wear-resistant Wax Dispersant

### Description

**Lencolo 5012** is a specially modified polymeric micro-particle dispersion. It is easy to use – simply disperse/mix and apply. It delivers excellent anti-graffiti performance, scratch resistance, abrasion resistance, smooth-touch feel and matting efficiency. It also offers good transparency, allowing the basecoat color to show through more clearly.

### Technical Data

Composition	Special high molecular polymer
Appearance	Milky white liquid
Solid Content	100%
Average Particle Size	2 um
Density	$1.15 \pm 0.05\text{g/cm}^3$

### Product Features

In UV coatings, it delivers excellent anti-graffiti and anti-fingerprint performance, along with outstanding scratch and abrasion resistance.

It is particularly suitable for UV coatings used in 3C applications, providing a soft matte appearance with high transparency. Unlike conventional wax powders, it avoids haze and transparency loss, while achieving an optimal balance between matting efficiency and surface tactile feel, delivering a soft, silky touch finish.

### Applications

UV wood floor coatings; UV PVC flooring coatings; UV coating for mobile phone; UV coating for surface treatment; anti-scratch matte UV coatings; anti-stain PU coatings; and anti-stain UV coatings, etc.

### Recommended Usage

Store at 0–25 °C, away from direct sunlight and high-temperature environments

Shake well before use and consume as soon as possible after opening

Avoid use under extremely high or extremely low temperatures

For best tactile and slip performance, pre-disperse at high shear for approximately 20 minutes before incorporating into the coating system

Dosage: 3~20% on total formulation weight

It is recommended that users determine the optimal dosage through preliminary testing before use.

## Storage Conditions

To prevent premature polymerization due to the high reactivity of this product, keep it tightly sealed and store away from heat sources and direct sunlight. It is recommended to maintain storage temperature below 30 °C. Unused product should be promptly resealed and must not be left open. Under ventilated conditions at 25 °C, the product has a safe storage period of 6 months. Available packaging: 25 kg per drum

**Tips:Lencolo 5012 is a 100% solids, UV-specific additive designed to significantly enhance anti-stain properties, abrasion resistance, and scratch resistance.**

Note: Technical data represents typical values only. In view of the differences in formulas, production process, conditions, all the above statements must be adjusted according to the actual situation, our company does not make any promises. Our company reserves the right to reform its products without prior notice of any changes.
